

## Mechanical Assembly

### Essential Duties and Responsibilities:

- Assemble mechanical components per assembly drawing and engineering specifications.
- Ability to quickly adapt to multiple projects in a fast paces, deadline oriented environment.
- Gauge completed assemblies using precision measuring instruments, to ensure conformity to specified tolerances.
- Mount, install, align, and secure machine components, operating various power hand tools.
- Safely uses straps, chains, and over-head crane to position large or heavy work pieces.
- Works in a team to complete projects in a timely, friendly, and safe manner.

### Skills:

- Knowledge of pneumatics and hydraulics
- Mechanical-Knowledge of machines and tools, including their uses and maintenance.
- Mathematics-Knowledge of arithmetic, algebra, geometry, and their applications.
- Analytical Thinking
- Attention to detail

Ideal candidate would include Technical Certificate/degree with 2-5 years experience in machine building, welding, machining, or electrical a plus. Candidates must have own hand tools.
