

# ARC-05HM Horizontal GMAW Cladder

## Turnkey Solutions Built Right

The ARC-05HM Horizontal GMAW Cladder allows for high deposition rates for ID and OD welding. The system is integrated with a pulsed power supply and Lincoln Electric's Power Wave Manager Software to provide maximum weld parameter control and process monitoring. ARC 5 PLC controls with touch screen operator interface steers the servo driven cross slides and headstock with 3-jaw chuck.

## Features

- Standard ARC 5 PLC control unit with touchscreen operator interface, weld schedule storage, and process monitoring through Lincoln Electric's Power Wave Manager Software.
- Self-contained, skid mounted unit with up to 450 amp welding power supply, and water cooled GMAW torch.
- Horizontal overlay process allows high deposition rates.
- Heavy duty slides with up to 50" horizontal travel and 24" vertical travel.
- Excellent system for cladding for corrosion or wear resistance. System performs well with inconel, Stellite and carbide covered wires.
