

# ARC-11PS Precision Saw System

## Turnkey Solutions Built Right

The ARC-11PS Precision Saw System is a fixed base precision saw that cuts oncoming screen. Touchscreen HMI controls are used with simple on/off selections by the operator. A rotating fixture grips the pipe and rotates in coordination with the saw blade to ensure uniform cutting across the screen.

## Features

- Touchscreen HMI
- Industrial grade 20" abrasive wheel powered by 20 HP motor
- Programmable speed and cut force control of blade
- 20' screen in-feed powered roller conveyor section
- 20' screen out-feed conveyor section
- Dust & debris collection unit
- Laser guidance for cut position
