

# ARC R-PAC 1000

## Robotic Plasma Cutting System

### Turnkey Solutions Built Right

- Automatically copes branch pipes and cuts trunk pipes with or without bevel
- Touch screen HMI with intuitive graphical display
- Wizard-based interface: Simply enter a few part dimensions and hit "Go." No robot programming required!
- Save, load, and store programs
- Speed compensation for material thickness
- Kerf compensation

### Available Options:

- Automatic pipe loading and unloading
- Pipe indexing system for cut-to-length
- Automatic marking
- Available with ABB, KUKA, or Fanuc robot
- Available with various power supplies
- Various 3-jaw chuck diameters, thru-hole diameters, and headstock load capacities
